METHOD
Method used is a participatory method, with participation active from public in every stage research, start from planning, implementation, up to evaluation. With involve public in a way straight away, will possible exists more understanding good about needs and potential society, so the resulting solution can more relevant and sustainable (Ambarwati, 2022).

RESULTS AND DISCUSSION
Study This done with gather public rural furthermore given enlightenment about negative impact of pile it up rubbish especially waste plastic, or can. So that found it solution that still plastic clean will changed its use for example make it bag with method weave. Another example is a bottle still plastic clean made a flower pot, place pencil place spice kitchen such as sugar and salt. Even all over work This can traded so that public get income addition. Whereas plastic already rather dirty can made become tear small ones which are plastic this can used as mixture material standard material buildings, and society can sell plastic as material standard material building the to the perpetrators business material building so that get income addition. For the perpetrators businesses also benefit Because with exists mixture material standard from waste plastic the will reduce cost material standard for the perpetrators business material building like bricks, paving blocks gap wind and so on. With reduced cost production so will increase perpetrators’ profits business the. Cans too, lots of them wasted cans vain. Still cans not yet rusty collected, which size big can used as a flower pot with painted moreover first, the small one can used as place pencil with coated paper gift, so seen beautiful. Can also used as place spices in the kitchen. All This can used yourself, but you can traded so that can get income addition.

CONCLUSION
From the results and discussion can concluded that with increase mark sell rubbish especially waste plastic and and can. With change waste still plastic good changed become material craft hand, meanwhile waste old plastic is used as material standard material building so that reduce cost production for perpetrator business material building the. Whereas can can changed be a flower pot, place pencil nor place spice kitchen. All This besides can used yourself, but you can traded so that get income addition.
